

SOUTHERN Brain & Spine

To Our Valued Patients:

While our patient satisfaction surveys reflect convenient patient access, Southern Brain & Spine is pleased to announce that we are again expanding our footprint in the Greater New Orleans area! As a direct result of your feedback and in an effort to better serve you, effective November 3rd, we will be vacating our EJ office and moving to a new Metairie office on the Tulane Lakeside campus at 4770 South I-10 Service Road West, Ste. 110. Additionally, our new office in New Orleans will be on the Touro campus, conveniently located at 3525 Prytania St., Ste. 418. As you may know, we currently have offices in Covington and Laplace, and a Kenner office may be coming soon. Our new offices will provide you with a variety of locations for easier access to care, and improved parking.

As we grow our offices to better serve you, we are also establishing new hospital relationships in Kenner, Metairie, and New Orleans. We are proud of these new associations with financially sound hospitals who share our commitment and dedication to the highest quality of medical care and who prioritize the health and wellness of the patient. We are delighted to move forward with partners who value the exceptional care for which our experienced and respected physicians are known. We look forward to updating you with information regarding our new locations. In the meantime, our contact information has not changed and you can still reach us at (504) 454-0141, Ext.1 or www.sbsdcs.net. We will continue to provide services to patients with private insurance, Medicare, workers' compensation and legal representation.

Southern Brain & Spine is growing with those most important to us – our patients. As is typical with transition, there may be some inconveniences, but as we move forward, our services to the communities of Jefferson, Orleans, the North Shore and the Gulf South region will grow and you can trust our dedication to your neurosurgical needs.

We endeavor to fulfill our mission of offering you timely access to quality, comprehensive, cutting edge neurosurgical care in a caring, personalized setting.

Sincerely,

Richard Corales, M.D.

Lucien Miranne, Jr., M.D., F.A.C.S.
